a
Distribution of number of trials per session
in IBL training dataset
animals
average # trials per session
simulation
mean
b
Recovery of transition matrix vs # trials per session
R squared
session
trials=100
trials=200
trials=400
trials=800
c
Recovery of weights vs # trials per session
R squared
session
trials=100
trials=200
trials=400
trials=800
d
stimulus
bias
weights
